                                                                                                                                                                                                                    $
                                                                                                                                                                                                                                                                                                                           The invention relates to an isolated polypeptide with signal sequences which allow it to be secreted extracellularly or membrane associated. The creativity of polypeptides of the invention may be described as, related to vulnerary, antiarteriosclerotic, antiparkinsonian, nootropic, cardiant, antilicer, virucide, antithyroid, cerebroprotective, amorectic, cand metabolic. Polypeptides and polynucleotides of the invention are compared to the control of cancer, considered to the control of cancer, considered to the control of cancer, considered to the control of cancer, confidential and the control of cancer, confidential and control of cancer, confidential and control of cancer, confidential and control of cancer, confidential and control of cancer, confidential and control of cancer, confidential and cancer, pancreatitis, respiratory disorder, confidential and disorders, pancreatitis, respiratory disorders, confidential diseases, metabolic diseases, hyper-immunity, confidential diseases, metabolic diseases, sperm dysfunction, thyroid confidential diseases, metabolic diseases, sperm dysfunction, thyroid convolution deficiency, neurological diseases, sperm dysfunction, thyroid convolution disorders, diseases in the spinal cord, thyroid gland, heart, convolution disorders, diseases in the spinal cord, thyroid gland, heart, confidential and control of parecocious puberty. The sequences given in records ABP60965-ABP61019 represent novel human control of the invention

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      424
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       365
```

The present invention relates to novel human secretory or memby proteins (ADA54072-ADA55710) and their coding sequences (ADA524ADA554071). The coding sequences are useful in the gene therapy diseases caused by abnormalities of the proteins, e.g. cancer, inflammatory diseases, osteoporosis or neurological disease.

secretory or membrane

New isolated NOVX polypeptide useful for treating atherosclerosis, metabolic disorders, diabetes, obesity, infectious disease, anorexia, neurodegenerative disorders, Alzheimer's disease and cancer.

Claim ۲, Page 303; 666pp; English.

The invention relates to human polypeptides, termed NOVX, and the polypucleotides encoding them. The polypeptides and polynucleotides are useful for diagnosing disease, and screening for potential therapeutic agents. The sequences are useful for treating metabolic disorders, cardiomyopathy, diabetes, hypertension, congenital heart defects, aortic stenosis, atrial septal defect (ASD), atrioventricular canal defect, ductus arteriosus, pulmonary stenosis, subaortic stenosis, ventricular septal defect (VSD), valve diseases, tuberous sclerosis, scleroderma, atherosclerosis, obesity, infectious disease, anorexia, neurodegenerative disorders, Alzheimer's disease, Parkinson's disease, immune disorders, haematopoietic disorders, haemophilia, hypercoagulation, Crohn's disease haematopoietic disorders, haemophilia, hypercoagulation, Crohn's disease and cancer. Sequences ABU54542-ABU54647 represent human NOVX polypeptides of the invention

                                                                                     The invention discloses a polymucleotide comprising a sequence selected CC from 1970 fully defined nucleotide sequences which encode novel CC polypeptides. Also claimed is a polypeptide encoded by the polymucleotide CC or ite partial peptide, an antibody binding to the polypeptide or peptide CC of the polymucleotide, immunologically assaying the polypeptide or peptide CC with the antibody of the encoded protein, and observing the binding CC between the two, a transformant carrying the polymucleotide in an CC is useful as a primer for synthesising the polymucleotide. The oligonucleotide CC is useful as a primer for synthesising the polymucleotide, or as a probe CC for detecting the polymucleotide. The polymucleotide and encoded genes may be included in them, for developing a diagnostic marker or CC medicines for regulation of their expression and activity, or as targets CC genes may be included in them, for developing a diagnostic marker or CC medicines for regulation of their expression and activity, or as targets CC respensation. Membrane proteins, signal transduction-related proteins, concertively or expression of the concertive proteins and genes are involved in tissue and/or cell CC respensation to the used as indicators for diseases (e.g. osteoporosis, neurological diseases, cancer, tumours. The cDNA may be used to regulate the activity or expression of the invention. Note: Some of the sequence data for this patent is not represented in the printed consecutions and sequence information supplied by the specification, but is based on sequence information supplied by the consecutions of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  δ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     New polynucleotides and polypeptides, useful for developing a diagnostic marker or medicines for regulation of their expression and activity, or as targets of gene therapy.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Isogai T, Sugiyama T,

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    protein;
```

Sequence 469 AA;

The present sequence represents a cat cauxin protein (I) or its salt, which is cat kidney disease marker. Also described: (1) a partial peptide (II) of (I); (2) a nucleic acid (III) encoding (I) or (II); (3) a vector

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          (IV) comprising (III); (4) a transformed host (V) comprising (III) or (IV); (5) producing (I) or (II) by culturing (V); (6) a antibody (VI) which couples specifically with (I) or (II); (7) diagnosing cat kidney disease which involves measuring (I) quantitatively, and where reduction of amount of (I) indicates presence of the disease; (8) a cat kidney disease diagnostic agent comprising (I) labelling agent, a reagent which measures the biological activity of urinary (I) or (VI); and (9) a cauxin detection kit which measures cauxin in a test sample. (I) is useful as a cat kidney disease marker and (VI) is useful for diagnosing cat kidney correctly. (I) provides an early marker for the disease, and replaces complicated diagnostic methods such as X-ray imaging, ultrasonic imaging,
                                                                                                                                                                                                                                                                                                                                                     ADF50147

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  81
```

```
CC The present sequence represents a cat cauxin protein (I) or its salt, CC which is cat kidney disease marker. Also described: (I) a partial peptide CC (II) of (I); (2) a nucleic acid (III) encoding (I) or (II); (3) a vector CC (IV); (5) producing (II) or (II) by culturing (V); (6) a antibody (VI) CC which couples specifically with (I) or (II); (7) diagnosing cat kidney CC disease which involves measuring (I) quantitatively, and where reduction CC of amount of (I) indicates presence of the disease; (8) a cat kidney CC disease diagnostic agent comprising (I) labelling agent, a reagent which CC measures the biological activity of urinary (I) or (VI); and (9) a cauxin CC detection kit which measures cauxin in a test sample. (I) is useful as a CC cat kidney disease marker and (VI) is useful for diagnosing cat kidney CC disease. (I) enables detection of cat kidney disease simply and CC correctly. (I) provides an early marker for the disease, and replaces CC complicated diagnostic methods such as X-ray imaging, ultrasonic imaging, CC blood testing.
                                 blood testing.

06-FEB-2001;
The invention relates to an isolated polypeptide with signal sequences which allow it to be secreted extracellularly or membrane associated. The activity of polypeptides of the invention may be described as, cytostatic, vulnerary, antiarteriosclerotic, antiparkinsonian, nootropic, neuroprotective, immunosuppressive, heemostatic, antiinflammatory, cardiant, antiuleer, virucide, antithyroid, cerebroprotective, anorectic, and metabolic. Polypeptides and polynucleotides of the invention are useful in the treatment, or as a vaccine in the prevention of, cancer, wound healing disorders, infection, atherosclerosis, Parkinson's disease and Alzheimer's disease, autoimmune disorder, haematopoietic disorder,
                                                                                                                                                                                                                                                                                                                                                                                                                         Secreted proteins and polynucleotides useful as vaccines for preventing or treating various diseases e.g. cancer, wounds, atherosclerosis, Parkinson's disease, Alzheimer's disease, infection, autoimmune disorder
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Agarwal P,
Martensen (

                                                                            Sequences AAF21614 - AAF22031 represent DNA sequences encoding human CC proteins AAB58711 - AAB59128. The DNA and protein sequences are associated with breast and ovarian cancer. Included in the invention are sequences AAF22032 - AAF22040 and AAB59129 which are used in the CC sequences AAF22032 - AAF22040 and AAB59129 which are used in the CC invention. The breast and ovarian cancer associated DNA, protein, agonist or antagonist sequences exhibit cytostatic; immunosuppressive; nontropic; entrinfilammatory; antivical; antiallergic; hepatotropic; antidiabetic; cc antifilingal; antiparastic and cardiant activity. The polynucleotide and CC protein sequences are used in the diagnosis of cancer, particularly protein, sequences are used in the diagnosis, prevention and treatment cf immune disorders e.g. Addison's disease, allergies, autoimmune confidence, autoimmune thyroiditis, diabetes mellitus, Crohn's cardiovascular disorders such as myocardial ischaemias; wound healing; inference, and elegans and epilepsy; and cardiang; and epilepsy; and cardiovascular disorders such as cerebral anoxia and epilepsy; and

       Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                DB seq length: 0

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
